Project Part II: Specifications

September 17, 2026

Due date: Tuesday, October 13, 2026, by 12:30 pm

Points: 100 Weight in project grade: 30%

A. Deliverables of Part II of the Project

For Part II of the project, you should provide a *Software Requirements Specification (SRS)* document with the following sections and subsections:

Table of contents

Introduction: a general description of 300 to 500 words. You can reuse *some* text from the Project concept (P-I) but try as much as possible to refine and enhance it. Describe the more significant changes to the project, if any (compared to the previous phase).

Requirements specification: *functional* and *non-functional requirements*, prioritized on 3 levels, as complete as possible.

Use case modeling:

- a. *Use case diagram*: between 10 and 20 use cases.
- b. *Detailed use cases*: concise text descriptions (2-4 lines each) for all the above use cases
- c. *Detailed templates* for 3 use cases.

Requirement traceability matrix: use cases – functional requirements.

Initial snapshots of the system's user interface: at least 6 with brief descriptions (but no more than 10 snapshots, as detailed GUI design will be part of P-III).

Glossary of terms (at least 18 terms; reference articles, with brief descriptions (40 to 70 words each). Note that in P-III, larger descriptions as well as details on how the reference articles help your project will be required.

Contributions of team members.

B Grading of Project Part II: Specification

- 1. Overall presentation of the SRS 15 points
- 2. Requirements (section 2) 30 points
- 3. Use case modeling (section 3) 25 points
- 4. All other sections 30 points

Total 100 points

Note that both the technical content and the presentation style (including quality of writing and document formatting) of your SRS will be taken into consideration when grading the project.
